

## **Journalism: Article Brief**

- **Publication details**

Title: 'Future of Construction

Distribution: *The Times* newspaper and on www.raconteur.net

Target Publication date: 13<sup>th</sup> June 2017

- **Article 5** (Page 12 & 13): Sustainability

Word count: 1000w + 250w case study

Writer: Jim McClelland

*Brief: The construction industry is a major contributor to environmental pollution, accounting for roughly 4% of particulate emissions. This global facing piece should identify the key areas of improvement in construction in reducing air pollution. Please highlight the importance of sustainable practices not only during the construction phase, but setting up the assets to enhance the environment during its entire lifecycle.*

*Box Out: Identify one particularly impressive example from around the world of a construction project that was exemplary from a sustainability point of view.*
